

The Essentials dividing curtain is a new take on “traditional” designs, with many improvements to increase durability and lower maintenance requirements.

- + These curtains mount on purlins or structural members, but do not require specific beam.
- + All are supplied with key operated electric winch with height limit settings.
- + Systems include heavy rip stop vinyl base that is mildew and fire resistant
- + The top section is a coated mesh instead of netting to increase durability.
- + Pickup cables are aircraft grade steel as opposed to nylon cord so they do not stretch and cannot easily be cut.
- + Simplified line shaft retraction system, eliminating complicated cable runs and the need for multiple high maintenance pulleys.
- + Padded lower pocket
