

**Also Available in Black**

The BMPINF system can be wheeled into position by a single person and set up in minutes. With no requirement for ground sleeves or anchors, it offers the fastest retrofit solution for sports halls, leisure centres, and multi-use facilities—maximising court availability and reducing downtime between sessions.

An outdoor-treated version, finished in black, is available for facilities requiring weather resistance. This allows easy conversion of outdoor courts for pickleball, further increasing year-round usability and return on investment.
