Top view:

The most durable Basketball ring in the world. This hoop features a double solid steel rim and a full-size plate metal wing wrap brace. The nets are attached through a milled net holder to ensure player safety, so fingers are not caught, eliminating the risk of laceration from broken net hooks and eliminating the chance of the net getting caught up on the hook. This rim is designed for long-term use in an outdoor venue exposed to high levels of dunking and is standard on our heavy metal range of products. *With a limited lifetime warranty.*
