

- + Prepares live match data for TV broadcast interface applications
 - + Duplicates TV protocols for multiple connected devices
 - + Suitable for FIBA Certified facilities and professional sporting events
 - + Compatible with the world-leading SCOREPAD controller
 - + Supports data exchange with Euroleague EBstat systems
- 
- A black rectangular device with yellow trim, labeled 'BOXPRO' and 'Bodet'. It has a QR code on the front and two ports on top. Red lines connect the device to the surrounding text blocks.

BOXPRO, your solution for protocol management and data exchange with SCOREPAD

BOXPRO meets your needs to send data from your sporting events. Connected to the SCOREPAD keyboard, the BOXPRO sends your match data in the desired format for TV broadcasting.

With BOXPRO from Bodet Sport, it is also possible to connect the SCOREPAD keyboard to the Euroleague match control system (EBstat PC). The TV protocol can be duplicated to be retrieved by several different devices.
