

- + Heavy-duty pole vault trough available in Aluminium, Stainless Steel and HDG steel. World Athletics certified with infill lid.
- + The cast aluminium model is manufactured from ½-inch thick cast aluminium with a reinforced underside for outstanding strength and stability.
- + The stainless steel model is fabricated to the exact dimensions required under World Athletics (WA) rules and incorporates reinforced stainless steel ribs for additional rigidity.
- + Stainless steel models are available in white or yellow finishes to suit facility requirements.
- + Designed to be set securely into concrete, every Pole Vault Trough is supplied with an infill lid, providing a safe and professional finish when the facility is not in use.
