

The RMA Sport ATH-RRL Running Rail and Plates system is a World Athletics (WA) Certified solution designed for modern Track and Field facilities. Manufactured from high-quality extruded aluminium, this durable Running Rail system provides a long-lasting, corrosion-resistant kerb (curb) for athletics tracks.

Designed to suit a variety of track layouts, the Running Rail is available in different radii to accommodate project-specific requirements. The aluminium construction delivers exceptional durability while remaining lightweight and resistant to rust, making it ideal for permanent outdoor installations in schools, universities, athletics clubs, and international competition venues.
